

HIDENATUR TRI

Artificial tricolour hedge

Benefits

Artificial hedge developed and manufactured by the Catral Group in our production plants. Thanks to the work carried out by the R&D department, we have created the first hedge with a realistic cut, mixing 3 different tones of sprigs, to imitate natural hedges as closely as possible. The result is a more realistic appearance and greater screening effect. What's more, in addition to the quality that has been proven over the years, recycled materials have been incorporated into the raw material.

Characteristics

Material : PVC + green plastic-coated wire
 Finish : folded ends
 Height : Real and exact height
 Number of lines : 38 rods per metre
 Weight : +/-1,2kg/m²
 Colours : light green, dark green, brown
 Sheet thickness : +/- 60 microns
 Recycled material : +/-50 %
 Packaging : PP mesh
 UV treatment : Yes
 Patent pending

Ref.	Height (H)	Length	Color
 2022587	1,00 x 3 m	vert clair - vert foncé - marron	1 unit
 2022588	1,50 x 3 m	vert clair - vert foncé - marron	1 unit
 2022589	2,00 x 3 m	vert clair - vert foncé - marron	1 unit
